Extra sections in Chinese universities have applied to the Ministry of Education for inclusion in the pilot program on Monday. More than 200 universities in the country have applied to be included in the program aimed at promoting high-quality education.

The extra sections, also known as "new models" of education, will allow universities to conduct teaching experiments with the aim of improving education quality.

The Ministry of Education said that the program, which started in 2017, has now become a national education reform and development plan.

The ministry has set up a committee to coordinate and monitor the program's implementation.

In the short term, the corridor will help reduce the economic pressure and boost the economy of the country.

"We believe that the new model will help universities to improve their education quality and contribute to the development of the country," said a ministry official.

In the medium term, the corridor will also help to reduce the economic pressure and promote economic development.

"The new model will help universities to improve their education quality and contribute to the development of the country," said a ministry official.

In the long term, the corridor will help to reduce the economic pressure and promote economic development.

"The new model will help universities to improve their education quality and contribute to the development of the country," said a ministry official.
