GBA is key to HK’s being global education hub

Liu Ning says the Guangdong’s efforts to expand its learning and business opportunities offer an work with SAR

**Effective regulations for cryptocurrencies in Hong Kong**

**Proportion of compliant cryptocurrencies in five developing markets**

**What do people in Hong Kong use cryptocurrency for?**

1. Investments
2. Payments (e.g., a furniture store)
3. Virtual games

**SMART MACHINE OFFERS...**

**HAKEEZY AGREED...**

**Jiangmen Municipal People’s Government signed a Smart City development agreement with the Shenzhen Court of International Arbitration.**

Hong Kong faces numerous disadvantages. Fewer job opportunities and a broader span of specializations for students, big demand for cross-border RMB settlement facilitation, lack of academic freedom when setting up new universities, also facing challenges to safeguard intellectual property rights, and the regulations of global top 20 cryptocurrencies.

However, Hong Kong, as the strong driving force of the GBA, can play a vital role in a global education hub and encourage more overseas students to come and seek for a better education environment. Hong Kong has the strengths to develop a global education hub and become Asia’s truly global education hub.
